

METAKITTYZ · ERIKA HERRERA

< PROMPT PACK V1.0

40

AI PROMPTS FOR CONTENT CREATORS

COPY-PASTE READY · CLAUDE · GPT-40 · GEMINI

The exact prompts used across the 6-agent AI content pipeline —
tested and refined across 90+ days of live builds. Organized by agent,
by output type, and by platform.

40 proven prompts

6-agent pipeline

Multi-platform

GUARDIAN QA included

01 MATRIX

02 NOVA

03 SPARK

04 PULSE

05 ARIA

06 GUARDIAN

BEFORE YOU START

How to use these prompts

Every prompt in this pack is designed to slot into the **Metakittyz 6-Agent Pipeline**. You can use them in order (full pipeline run) or pick individual prompts to solve a specific content problem. All prompts are copy-paste ready for Claude (claude-opus-4-8 recommended), GPT-4o, and Gemini.

REPLACE VARIABLES

Every **[BRACKETS]** in a prompt is a variable you replace with your specific info before running. Fill them all before you paste.

FOLLOW THE AGENT ORDER

Run agents 01 → 06 in sequence. MATRIX output feeds NOVA. NOVA output feeds SPARK. Don't skip ahead — each agent builds on the last.

COPY OUTPUT INTO NEXT PROMPT

At the end of each agent prompt, paste the **full output** into the next agent's **[PREVIOUS AGENT OUTPUT]** field. This is how the pipeline stays coherent.

GUARDIAN IS NON-NEGOTIABLE

Always run the GUARDIAN QA gate (Prompts 33–40) before publishing. Never skip it. Use GPT-4o for GUARDIAN — intentional separation from your primary LLM.

VARIABLE	WHAT TO PUT HERE	EXAMPLE
[BRAND_NAME]	Your brand or creator handle	Metakittyz
[NICHE]	Your specific content category	AI tools for content creators
[AUDIENCE]	Who you make content for	Beginner creators learning AI
[PLATFORM]	Where this content lives	TikTok / Instagram / LinkedIn
[GOAL]	What this piece of content must do	Drive traffic to free AI workshop
[CONTENT_TYPE]	Format of the content	60-sec Reel / carousel / email
[TOPIC]	Specific subject of this piece	How I built a 6-agent AI system
[HOOK]	Your opening line or title	I let AI run my content for 30 days...

AGENT 01 · PROMPTS 1-6

MATRIX

Strategic Foundation — brand voice, positioning, content pillars, and audience intelligence. Run MATRIX once per campaign or whenever your strategy shifts. Its output is the foundation every other agent builds on.

PROMPTS 01 — 06

01

PROMPT 01 Brand Voice Calibration

Claude · GPT-4o · Gemini

Run this once before any campaign. The output becomes your Brand Voice Document — paste it at the top of every NOVA, SPARK, and ARIA prompt.

You are MATRIX, a strategic AI content architect. Create a comprehensive Brand Voice Document for the following brand.

Brand Name: [BRAND_NAME]

Niche: [NICHE]

Target Audience: [AUDIENCE]

Primary Goal: [GOAL]

Deliver exactly:

1. **PERSONALITY MATRIX** — 5 adjectives that define the brand voice + 3 things it NEVER sounds like
2. **TONE SCALES** — Rate 1-10: Formal, Playful, Technical, Vulnerable, Aspirational
3. **POWER PHRASES** — 10 phrases/words unique to this brand voice (not generic)
4. **CONTENT RED LINES** — 3 topics or tones this brand never touches and why
5. **VOICE IN ACTION** — Write one paragraph in this brand's authentic voice introducing the creator

Output as a structured document. Be specific. No generic answers.

PRO TIP — Save this output as your "Brand Voice Doc." Reference it in every downstream prompt under a section called BRAND CONTEXT.

PROMPT 02 Niche Positioning Statement

Claude · GPT-4o · Gemini

Creates a razor-sharp one-sentence positioning statement and a longer brand bio. Use these in bios, pitches, and the top of every agent's system prompt.

You are MATRIX, a positioning strategist. Define the exact market position for this creator brand.

Creator Name: [BRAND_NAME]

Niche: [NICHE]

Audience: [AUDIENCE]

Differentiator (what makes them different): [describe what's unique]

Top 3 competitors in this space: [list]

Deliver:

1. **ONE-SENTENCE POSITIONING STATEMENT** – the brand in one sentence, unforgettable
2. **3-SENTENCE BIO** – for social media profiles
3. **PLATFORM-SPECIFIC BIOS** – tailored 150-char version for TikTok, 160-char for Twitter, 300-char for LinkedIn
4. **GAP ANALYSIS** – one paragraph on the positioning gap this brand fills that competitors miss

USAGE — The one-sentence positioning becomes your MATRIX system prompt identity line.

PROMPT 03 90-Day Content Pillar Map

Claude · GPT-4o · Gemini

Maps out your content pillars for a full 90-day run. Run this once per quarter or at the start of a new campaign arc.

You are MATRIX, a content strategy architect. Build a 90-day Content Pillar Map.

Brand: [BRAND_NAME] – [NICHE]

Audience: [AUDIENCE]

Primary platforms: [PLATFORM]

Business goal this quarter: [GOAL]

Content cadence (posts per week): [number]

Deliver:

1. **CONTENT PILLARS** – 4 core content pillars with name, purpose, and example topics (3 per pillar)
2. **PILLAR DISTRIBUTION** – % of content per pillar per week
3. **MONTHLY ARCS** – Theme for Month 1, 2, 3 that ladder up to the quarterly goal
4. **CONVERSION FUNNEL MAPPING** – which pillar serves Awareness / Consideration / Decision
5. **SAMPLE WEEK** – show one full week of posts across platforms using this pillar system

NOTE — Feed this map into NOVA at the start of every content session as context.

PROMPT 04 Audience Avatar Deep-Dive

Claude · GPT-4o · Gemini

Builds a rich, specific audience avatar that makes every downstream prompt dramatically more targeted.

You are MATRIX, an audience intelligence analyst. Build a deep audience avatar for this brand.

Brand: [BRAND_NAME]

Niche: [NICHE]

Who you think your audience is: [describe]

Platform where they find you: [PLATFORM]

Deliver:

1. **PRIMARY AVATAR** – Name, age, job, daily routine, pain points (x3), dreams (x3), what they search at 11pm
2. **CONTENT TRIGGERS** – 5 specific things that make them stop scrolling and watch/read
3. **OBJECTION MAP** – 3 reasons they might not follow/buy and how to preemptively address each
4. **LANGUAGE BANK** – 10 exact phrases/words this person uses in their own life (not how you'd describe them, how THEY speak)
5. **PLATFORM BEHAVIOR** – How this avatar uses [PLATFORM] specifically (time of day, content format preference, scroll behavior)

PROMPT 05 Competitor Content Gap Analysis

Claude · GPT-4o

Find the exact content gaps your competitors are leaving open. Run this before planning a new content series.

You are MATRIX, a competitive intelligence specialist. Run a content gap analysis.

My Brand: [BRAND_NAME] – [NICHE]

Competitors to analyze: [list 3–5 competitors]

My primary platform: [PLATFORM]

Deliver:

1. **CONTENT THEY'RE DOING WELL** – top 3 content patterns each competitor dominates
2. **WHAT THEY'RE MISSING** – 5 specific content angles no competitor is covering well
3. **AUDIENCE COMPLAINTS** – based on common patterns, what does the audience in this niche wish someone would make?
4. **BLUE OCEAN TOPICS** – 5 topic ideas that would be genuinely differentiated in this space
5. **MY POSITIONING WEDGE** – one paragraph on exactly where [BRAND_NAME] can win in this competitive landscape

Be specific. No generic advice.

PROMPT 06 Platform Priority Strategy

Claude · GPT-4o · Gemini

Decide where to focus first. Especially useful when starting out or pivoting to a new platform.

You are MATRIX, a platform strategy architect. Determine the optimal platform priority for this creator.

Creator: [BRAND_NAME]

Niche: [NICHE]

Audience: [AUDIENCE]

Current following (by platform): [list platforms + follower counts]

Content formats you can produce: [e.g., short video, long video, written, audio]

Time budget per week: [hours]

Primary goal: [GOAL]

Deliver:

1. **PLATFORM TIER LIST** – rank platforms (Tier 1: primary, Tier 2: secondary, Tier 3: repurpose only)
2. **PRIORITY RATIONALE** – why Tier 1 is the right starting point given the inputs
3. **30-DAY PLATFORM SPRINT** – specific actions for the first 30 days on Tier 1
4. **CROSS-POST STRATEGY** – how to repurpose Tier 1 content across Tier 2 and 3 with minimal extra work

AGENT 02 · PROMPTS 7-12

NOVA

Content Ideation Engine — hooks, angles, story arcs, and idea generation. NOVA takes the MATRIX foundation and generates specific, platform-aware content concepts. Feed NOVA the brand voice doc from Prompt 01 every time.

PROMPTS 07 — 12

02

PROMPT 07 Hook Generator — 3-Format Batch

Claude · GPT-4o · Gemini

Generates 15 hooks (5 per format) for one topic. Saves hours of brainstorming in one shot.

You are NOVA, a viral content ideation engine. Generate a batch of hooks for the following content brief.

BRAND CONTEXT: [paste Brand Voice Doc from Prompt 01]

Topic: [TOPIC]

Platform: [PLATFORM]

Audience: [AUDIENCE]

Generate 5 hooks for each of the following formats:

FORMAT A — SCROLL STOPPER: Opens mid-action or mid-thought. No "today I" or "I'm going to show you." Drops the viewer into a moment.

FORMAT B — BOLD CLAIM: A counterintuitive or surprising statement about the topic that's true but unexpected.

FORMAT C — CURIOSITY GAP: Sets up a question or mystery the viewer HAS to resolve. Teases the payoff without giving it away.

For each hook, add one line explaining the psychological trigger it uses.

Rate each hook 1-10 on its likely stop-scroll power.

NEXT STEP — Feed your top 3 hooks into SPARK Prompt 13 for scoring and rewriting.

PROMPT 08 Trending Angle Finder

Claude · GPT-4o

Finds the angle that makes your unique story ride a trending narrative pattern. Works best when you give it a specific trend or cultural moment to plug into.

You are NOVA, a cultural intelligence analyst and content strategist.

My topic: [TOPIC]

My niche: [NICHE]

My audience: [AUDIENCE]

Current trend or cultural moment to tap (optional): [trend/moment or leave blank]

Deliver:

1. **TREND INTERSECTION** – how my topic connects to current cultural conversations in my niche
2. **5 ANGLED TOPIC VERSIONS** – 5 reframes of my topic that would feel timely and relevant right now
3. **THE ZEITGEIST HOOK** – one headline that makes my topic feel like the conversation everyone's having
4. **SHELF LIFE ASSESSMENT** – which angle has lasting value (evergreen) vs. which is timing-dependent

PROMPT 09 Story Arc Builder

Claude · GPT-4o · Gemini

Turns a flat topic into a narrative structure. Use this for longer content: video essays, newsletters, carousels, podcast episodes.

You are NOVA, a narrative architect. Build a story arc for the following content brief.

Topic: [TOPIC]

Format: [CONTENT_TYPE] (e.g., 8-minute video / 10-slide carousel / 800-word newsletter)

Core message (what you want the audience to feel/believe after): [describe]

Personal experience to draw from: [your relevant story, optional]

Build a story arc with:

- ACT 1 – THE HOOK:** Open with the most visceral or surprising moment
- ACT 2 – THE TENSION:** The problem, struggle, or misconception the audience holds
- ACT 3 – THE TURN:** The insight, discovery, or shift in perspective
- ACT 4 – THE PROOF:** Evidence, story, or demonstration
- ACT 5 – THE INVITATION:** The CTA or transformation you're inviting them into

For each act: write the transition phrase and the emotional state you want the viewer in.

PROMPT 10 Series / Thread Concept Generator

Claude · GPT-4o · Gemini

Creates a multi-part content series concept. Great for building audience retention and repeat viewers/readers over time.

You are NOVA, a serialized content strategist. Design a multi-part content series.

Core topic area: [TOPIC]

Platform: [PLATFORM]

Audience: [AUDIENCE]

Series length goal: [e.g., 5 parts / 10 posts / ongoing]

Deliver:

1. **SERIES CONCEPT** – name, premise, and why this format works for the audience
2. **EPISODE/PART BREAKDOWN** – title and one-sentence summary for each part
3. **THE HOOK PROMISE** – what question or transformation the series promises to answer/deliver
4. **RETENTION MECHANIC** – the cliffhanger or open loop that makes each part end wanting the next
5. **TITLE SYSTEM** – a naming convention for the series that builds recognition (e.g., "Build Log #01", "Day X of 90")

PROMPT 11 Controversy-Free Viral Angle

Claude · GPT-4o · Gemini

Finds provocative angles that generate engagement without triggering brand safety issues or audience alienation.

You are NOVA, a viral content strategist who specializes in high-engagement, brand-safe angles.

Topic: [TOPIC]

Brand voice: [paste from Prompt 01 or summarize]

Audience: [AUDIENCE]

Find 5 angles that are:

- Surprising or counterintuitive (makes people think "wait, really?")
- Opinion-worthy (people will agree OR disagree – both drive comments)
- 100% brand-safe and aligned with my content red lines
- NOT dependent on attacking anyone, drama, or news cycle

For each angle:

ANGLE TITLE: One punchy headline

THE CONTRARIAN TAKE: What conventional wisdom does this challenge?

THE TRUTH BEHIND IT: Why is this angle defensible and true?

COMMENT TRIGGER: What question will people feel compelled to respond to?

PROMPT 12 Repurpose Engine – 1 Idea → 5 Formats

Claude · GPT-4o · Gemini

Takes one piece of content and adapts it for 5 different platforms or formats. Maximizes output with minimal extra work.

You are NOVA, a content repurposing strategist. Transform one content idea into 5 formats.

Original idea or piece of content: [paste your core content or idea]

Original format it was created for: [CONTENT_TYPE + PLATFORM]

Audience: [AUDIENCE]

Adapt this for each of the following (create a unique angle/approach for each – NOT just a copy-paste):

- **TikTok/Reel (60-sec)**: Hook + 3 key points + CTA
- **LinkedIn Carousel (5 slides)**: Title + slide-by-slide outline
- **Twitter/X Thread (8 tweets)**: Tweet 1 hook + 7 continuation tweets
- **Email Newsletter (intro paragraph)**: 150 words, personal tone, clear subject line
- **Instagram Caption (short + long)**: Under 150 chars + 300-word expanded version

For each format, rewrite the hook to fit the platform's native language and pacing.

AGENT 03 · PROMPTS 13-18

SPARK

Viral Optimization Engine — scores and rewrites hooks, audits retention arcs, injects pattern interrupts. SPARK uses a 40-point scoring system: Hook (10), Retention (10), Shareability (10), CTA (10). Minimum passing score: 28/40.

PROMPTS 13 — 18

03

PROMPT 13 Hook Score + Rewrite (SPARK 40-pt Scale)

Claude · GPT-4o · Gemini

The core SPARK scoring prompt. Scores your hook and rewrites it to pass the 28/40 minimum. Run every hook through this before recording or publishing.

You are SPARK, a viral content scoring engine. Analyze and rewrite the following hook.

Hook to analyze: [HOOK]

Platform: [PLATFORM]

Target audience: [AUDIENCE]

Content topic: [TOPIC]

SCORE on the SPARK 40-point scale:

HOOK POWER (0-10): Does it create an immediate reason to keep watching/reading?

RETENTION ARC (0-10): Does it set up a question or tension the content must resolve?

SHAREABILITY (0-10): Would someone send this to a friend? Why or why not?

CTA ALIGNMENT (0-10): Does the hook align with where the content is driving them?

TOTAL SPARK SCORE: __/40

If score is below 28/40, **REWRITE** the hook 3 times to achieve a score of 30+.

For each rewrite, explain which dimension you improved and why.

MINIMUM TO PASS: 28/40. Do not approve any hook below this threshold.

PIPELINE RULE — A hook that scores below 28/40 goes back to NOVA (Prompt 07). Don't skip to PULSE.

PROMPT 14 Retention Arc Audit

Claude · GPT-4o · Gemini

Audits your full content script or outline for drop-off points. Critical for video content where watch time is the main algorithm signal.

You are SPARK, a retention optimization specialist. Audit this content for watch-time / read-time drop-off.

Content script or outline: [paste full script or detailed outline]

Format: [CONTENT_TYPE]

Target length: [seconds for video / word count for written]

Deliver:

1. **RETENTION MAP** – identify every point in the content where the audience is likely to drop off and why
2. **DANGER ZONES** – the 3 highest-risk moments (flag with timestamp or section)
3. **OPEN LOOP AUDIT** – count active open loops at each 25% mark (there should always be at least one unresolved question)
4. **REWRITES** – for each danger zone, write an improved version that re-hooks attention
5. **RETENTION SCORE** – estimated % of audience still watching/reading at: 25% / 50% / 75% / 100% mark

PROMPT 15 Shareability Score + Boost

Claude · GPT-4o · Gemini

Audits your content for share-worthiness and gives specific copy tweaks that increase the chance someone will send it to a friend.

You are SPARK, a social sharing strategist. Analyze and boost the shareability of this content.

Content: [paste content draft]

Platform: [PLATFORM]

Audience: [AUDIENCE]

SHAREABILITY SCORE (0–10): Rate on: Identity expression / Usefulness / Entertainment / Surprise

For each dimension scored below 8, provide:

- What's missing
- A specific rewrite (min. 2 options) that boosts that dimension

SHARE TRIGGER AUDIT: Does the content contain at least one of these share triggers?

- ☐ "This is so me" (identity resonance)
- ☐ "I need my friend to see this"
- ☐ "This changed how I think about X"
- ☐ "I need to save this for later"
- ☐ "This will blow their mind"

Rewrite the ending of the content to strengthen whichever share trigger is weakest.

PROMPT 16 CTA Power-Up

Claude · GPT-4o · Gemini

Rewrites weak CTAs into ones that feel natural, not salesy. The CTA should feel like the logical next step, not a request.

You are SPARK, a conversion copy specialist. Rewrite this call-to-action.

Current CTA: [paste current CTA or describe what you're asking people to do]

Desired action: [follow / comment / click link / save / share / buy / sign up]

Platform: [PLATFORM]

Brand voice: [formal / casual / playful / direct – from Prompt 01]

The content just talked about: [one-sentence summary]

Write 5 CTA versions:

V1 – **IDENTITY CTA**: Makes following/clicking feel like it says something about who they are

V2 – **RECIPROCITY CTA**: Frames the action as them getting something valuable in return

V3 – **COMMUNITY CTA**: Invites them into something, not just asks them to do something

V4 – **URGENCY CTA**: Mild urgency without fake scarcity

V5 – **MICRO-COMMITMENT CTA**: The smallest possible action (save, comment one word, etc.)

Rate each CTA on: Naturalness (1–10) and Conversion Power (1–10).

PROMPT 17 Pattern Interrupt Injection

Claude · GPT-4o · Gemini

Adds unexpected moments to your content that re-grab attention when it's starting to drift. Use at the 30% and 60% marks of any video.

You are SPARK, a pattern interrupt specialist. Add attention-recapture moments to this content.

Content script or outline: [paste]

Format: [CONTENT_TYPE]

Tone of content: [serious / educational / entertaining / hybrid]

Identify 2 moments in the content where attention is most likely to drift.

For each moment, write 3 pattern interrupt options:

TYPE A – CONTRAST: Sudden tonal shift (e.g., from serious to funny, or from abstract to intensely personal)

TYPE B – UNEXPECTED FACT: A stat, claim, or detail that makes them go "wait, really?"

TYPE C – DIRECT BREAK: Directly address the viewer ("if you're still watching..."), self-awareness move

For each: write the exact words to say/write and the transition into + out of the interrupt.

PROMPT 18 3-Second Scroll-Stop Opener

Claude · GPT-4o · Gemini

Specifically engineered for short-form video. The first 3 seconds are the algorithm's entire decision about whether to push your content. This prompt writes those 3 seconds.

You are SPARK, a short-form video optimization expert. Write 5 versions of a 3-second scroll-stop opener.

Topic: [TOPIC]

Platform: [TikTok / Instagram Reels / YouTube Shorts]

The big reveal or payoff in the video: [what happens at the end or the core insight]

Tone: [from brand voice doc]

RULES for a scroll-stopping 3-second opener:

- No "hey guys" or "so today"
- Starts mid-action, mid-sentence, or mid-revelation
- Visual action and verbal hook happen simultaneously
- Creates an immediate question the viewer must stay to answer

Write 5 openers. For each, include:

WHAT TO SAY (exact words)

WHAT TO SHOW (visual action happening simultaneously)

THE OPEN LOOP (the question it creates that demands they stay)

STOP-SCROLL POWER: Rate 1–10

AGENT 04 · PROMPTS 19–26

PULSE

Platform Adaptation Engine — takes optimized content concepts and formats them natively for each platform. PULSE knows the native language of TikTok, Instagram, LinkedIn, Twitter/X, email, and YouTube. Input the SPARK-approved content for best results.

PROMPTS 19 – 26

04

PROMPT 19 TikTok / Instagram Reel Script (60–90 sec)

Claude · GPT-4o · Gemini

Writes a complete, ready-to-record short-form video script with visual direction cues.

You are PULSE, a short-form video script specialist. Write a 60–90 second TikTok/Reel script.

Topic: **[TOPIC]**

Approved hook (from SPARK): **[HOOK]**

Core message: **[what the viewer should feel/know/do after watching]**

Brand voice: **[from Prompt 01]**

CTA: **[desired action]**

Script format – include:

[0:00–0:03] HOOK – exact words + what's happening on screen

[0:03–0:15] SETUP – context, tension, or the problem being addressed

[0:15–0:45] CONTENT BODY – 3 main points, each a maximum of 10 seconds

[0:45–1:00] PAYOFF – the insight, transformation, or reveal

[1:00–1:15] CTA – natural, not salesy

For each section: write the spoken words AND a brief visual direction note.

Mark every open loop that's created and when it closes.

PROMPT 20 YouTube Short Script + Thumbnail Text

Claude · GPT-4o · Gemini

YouTube Shorts have different viewer behavior than TikTok — higher completion rates but lower share rates. This prompt optimizes for completion and subscription.

You are PULSE, a YouTube content strategist. Write a YouTube Short script optimized for completion rate and subscriber conversion.

Topic: [TOPIC]

Hook: [HOOK]

Audience: [AUDIENCE]

Desired outcome: [subscribe / watch longer video / click link]

Deliver:

TITLE (max 60 chars): Optimized for search + click

THUMBNAIL TEXT (max 5 words): Bold, visible at thumbnail size

SCRIPT: 45–60 seconds

- Second 1–3: Hook (no "hey guys")
- Second 4–15: Why this matters RIGHT NOW
- Second 16–45: The substance (one clear, actionable insight)
- Second 46–60: CTA that mentions subscribing as "joining" not "subscribing"

DESCRIPTION (150 words): SEO-optimized, includes 5 keywords, links section placeholder

PROMPT 21 LinkedIn Carousel – 8-Slide Outline

Claude · GPT-4o · Gemini

LinkedIn carousels consistently outperform all other content types for reach. This prompt creates a swipe-worthy structure with native LinkedIn language.

You are PULSE, a LinkedIn content strategist. Create an 8-slide carousel outline.

Topic: [TOPIC]

Hook: [HOOK]

Audience on LinkedIn: [AUDIENCE – be specific about their professional role]

Core insight or framework: [the main takeaway]

SLIDE 1 – COVER: Hook headline (max 10 words) + subheading + visual direction

SLIDE 2 – THE PROBLEM: What they're getting wrong right now (1 punchy sentence + 2 bullets)

SLIDES 3–6 – THE SOLUTION: One insight per slide. Headline + 2-3 bullet points per slide

SLIDE 7 – THE TRANSFORMATION: Before/After or the outcome they'll achieve

SLIDE 8 – CTA: Follow prompt + save prompt + comment prompt (all 3)

For each slide: write headline copy, body copy, and a visual/design note.

Post caption: Write a 200-word LinkedIn caption that works even without swiping.

PROMPT 22 Twitter / X Thread – 10 Tweets

Claude · GPT-4o · Gemini

Twitter threads live or die by Tweet 1 and the transition from Tweet 1 to Tweet 2. This prompt engineers both.

You are PULSE, a Twitter/X thread specialist. Write a 10-tweet thread.

Topic: [TOPIC]

Core insight to communicate: [the main idea in one sentence]

Audience: [AUDIENCE]

Tone: [from brand voice – direct / analytical / storytelling]

Structure:

TWEET 1: The hook. Bold claim or surprising insight. Ends with "Here's what I learned:" or "Thread 🧵"

TWEETS 2–8: One insight per tweet. Each must:

- Stand alone (make sense without context)
- End with a setup for the next tweet (implied or explicit)
- Be max 250 characters

TWEET 9: The big synthesis – "The thing no one tells you about [topic] is..."

TWEET 10: CTA tweet – follow, save, share. Must include a question to drive replies.

Format each tweet with the number and character count.

PROMPT 23 Instagram Caption – 3 Lengths

Claude · GPT-4o · Gemini

Generates captions for three different use cases: the quick scroll, the engaged reader, and the searchable post. Pick one or A/B test them.

You are PULSE, an Instagram caption writer. Write 3 caption versions for the same post.

Post topic: [TOPIC]

Image/video description: [describe what the visual shows]

Audience: [AUDIENCE]

Brand voice: [from Prompt 01]

Goal: [saves / comments / profile visits / link clicks]

VERSION A – MICRO (under 80 chars): One arresting sentence. No hashtags. Pure signal.

VERSION B – STANDARD (150–250 chars): Hook + one supporting line + CTA. Ends with a question.

VERSION C – LONG FORM (300–500 chars): Hook + 2–3 sentences of value + CTA + 10–15 hashtag recommendations

For each: note which engagement goal it serves best and the best time to post for this audience.

PROMPT 24 Email Subject Line Generator – 10 Options

Claude · GPT-4o · Gemini

Generates 10 subject lines using different psychological triggers. Test 2–3 against each other for best results.

You are PULSE, an email marketing specialist. Write 10 subject lines for the following email.

Email topic: [TOPIC]

Audience: [AUDIENCE]

Email type: [newsletter / promotional / welcome / nurture]

The most valuable thing in this email: [what's the #1 reason to open it?]

Write 2 subject lines for each of these 5 triggers:

CURIOSITY: Creates an itch that only opening the email scratches

SELF-INTEREST: Makes the benefit immediately obvious ("How to X in Y")

SOCIAL PROOF: Uses numbers, results, or "everyone is doing this"

URGENCY / FOMO: Time or scarcity signal (no fake deadlines)

PATTERN BREAK: Unusual or unexpected structure that stands out in the inbox

For each: predicted open rate (low/medium/high), best audience segment, and whether a preview text is needed.

PROMPT 25 Newsletter Body – 600–800 Words

Claude · GPT-4o · Gemini

Writes a full newsletter that feels like it's from a human, not a brand. Uses the "friend who figured something out" tone.

You are PULSE, a newsletter writer who sounds like a person, not a company. Write a 600–800 word newsletter.

Topic / Insight: [TOPIC]

Personal angle or story to open with: [describe – even a small detail works]

Audience: [AUDIENCE]

Brand voice: [from Prompt 01]

One thing you want them to do by the end: [CTA / GOAL]

Structure:

OPENER: Personal moment or observation (2–3 sentences, hook into the topic)

THE INSIGHT: The main idea – what you've learned, noticed, or built (250–300 words)

THE APPLICATION: What they can DO with this insight – specific, actionable (200–250 words)

THE CLOSE: Personal signoff + 1 question to spark replies + CTA (100–150 words)

Rules: No jargon. No "In conclusion." No "I hope this email finds you well."

Write in 2nd person ("you") and use short paragraphs (max 3 sentences each).

PROMPT 26 Pinterest Description Pack

Claude · GPT-4o · Gemini

Pinterest is a search engine, not a social network. This prompt writes SEO-optimized descriptions that compound over time.

You are PULSE, a Pinterest SEO specialist. Write a description pack for the following pin.

Pin topic: **[TOPIC]**

What the image shows: **[describe visual]**

Audience searching on Pinterest: **[AUDIENCE – describe their search intent]**

Link destination: **[blog post / product page / opt-in / video]**

Deliver:

TITLE (max 60 chars): Keywords first, benefit clear

DESCRIPTION (100 words): Starts with primary keyword, naturally includes 5–7 keywords, ends with CTA

KEYWORD LIST: 15 Pinterest-specific search terms for this topic (mix of broad + long-tail)

BOARD RECOMMENDATIONS: 3 board names this pin should live in

ALT TEXT: Descriptive, keyword-rich, 125 chars max

AGENT 05 · PROMPTS 27–32

ARIA

Final Polish Engine — voice alignment, emotional resonance, brand consistency, and copy refinement. ARIA is the last stop before GUARDIAN. It catches everything the other agents missed and elevates the writing from "good" to "unmistakably yours."

PROMPTS 27 — 32

05

PROMPT 27 Voice & Tone Alignment Sweep

Claude · GPT-4o · Gemini

Compares your drafted content against the brand voice doc and flags every line that doesn't sound like you. Critical before anything goes live.

You are ARIA, a brand voice specialist and editorial editor. Run a voice alignment sweep.

BRAND VOICE DOCUMENT: [paste from Prompt 01]

CONTENT TO REVIEW: [paste full draft]

Deliver:

1. **VOICE ALIGNMENT SCORE**: Rate 1–10. How consistently does this sound like the brand?
2. **OFF-BRAND LINES**: Flag every line that doesn't sound like the brand. Quote each one.
3. **REWRITES**: For each flagged line, provide 2 on-brand alternatives
4. **GENERIC LANGUAGE AUDIT**: Find and replace any clichés, filler phrases, or AI-sounding sentences
5. **SIGNATURE LANGUAGE**: Where could the brand's power phrases (from the Brand Voice Doc) be naturally inserted?

Final output: The full content with all edits applied. Mark every change in [brackets].

PROMPT 28 Emotional Resonance Audit

Claude · GPT-4o · Gemini

Measures the emotional impact of your content and identifies where it goes flat. Emotion drives sharing — this prompt finds the gaps.

You are ARIA, an emotional intelligence specialist in content strategy. Audit this content for emotional resonance.

Content: [paste draft]

Target emotional journey (how you want the reader/viewer to feel): [describe the arc — e.g., "confused → curious → inspired → empowered"]

Deliver:

1. **EMOTIONAL MAP**: For each paragraph/section, identify the emotion it creates in the reader
2. **FLAT SPOTS**: Where does the emotional tone go neutral or disconnected?
3. **PEAK MOMENT**: Identify the single most emotionally charged moment in the content
4. **REWRITES**: For each flat spot, write a version that restores emotional momentum
5. **EMOTIONAL SCORE**: Does this content create at least one "felt in the chest" moment? Yes/No + where.

The ideal content has one emotional peak and gradually builds toward it.

PROMPT 29 Brand Consistency Scanner

Claude · GPT-4o · Gemini

Checks all content elements (messaging, claims, terminology) against your brand standards. Catches the inconsistencies that erode trust over time.

You are ARIA, a brand integrity specialist. Scan this content for brand consistency.

Content: [paste draft]

Brand standards to check against:

- Terminology we always use: [list brand-specific terms]
- Terms we never use: [list banned terms or competitor names]
- Claims we make: [list your standard value propositions]
- Our content red lines: [from Prompt 01]

Scan for:

- TERMINOLOGY VIOLATIONS**: Any use of banned terms or competitor names
- CLAIM CONSISTENCY**: Does this content contradict anything the brand has previously stated?
- RED LINE PROXIMITY**: Does any content come close to a red line topic even if not crossing it?
- COMPETITOR COMPARISONS**: Any implied or explicit comparisons that should be removed?

Output: Clean version with all issues resolved. Flag each fix.

PROMPT 30 Hook → CTA Continuity Check

Claude · GPT-4o · Gemini

Ensures your hook promise is fulfilled by the content and that the CTA is the natural next step. A hook that promises one thing but delivers another destroys trust.

You are ARIA, a narrative continuity editor. Check the hook-to-CTA promise fulfillment.

Full content (hook through CTA): **[paste]**

Analyze:

1. **HOOK PROMISE**: What implicit or explicit promise does the hook make?
2. **BODY FULFILLMENT**: Does the body content fully deliver on that promise? Rate 1–10.
3. **CTA ALIGNMENT**: Is the CTA the logical next step given what was promised and delivered?
4. **PROMISE GAPS**: List anything the hook promised that the body didn't fully deliver
5. **FIX OPTIONS**: For each gap – either rewrite the hook to not over-promise, OR expand the body to fulfill the promise

Rule: The viewer/reader should never feel like they were misled about what the content would give them.

PROMPT 31 Power Word Injection

Claude · GPT-4o · Gemini

Upgrades flat, generic language with specific, sensory, emotionally charged words. Turns "good content" into content people remember.

You are ARIA, a copywriting specialist in power language and specificity. Upgrade this content's language.

Content: **[paste draft]**

Desired emotional tone: **[e.g., urgent / empowering / intimate / bold / playful]**

Scan every sentence for:

- WEAK VERBS**: Replace any form of "is/are/was/have/get" with active, specific verbs
- GENERIC ADJECTIVES**: Replace "great," "amazing," "good," "real" with specific, sensory alternatives
- ABSTRACT PHRASES**: Replace vague concepts with concrete examples or sensory details
- FILLER WORDS**: Remove "just," "basically," "actually," "kind of," "a little bit"
- PASSIVE VOICE**: Convert all passive constructions to active voice

Output: Full rewritten version. For the 5 biggest upgrades, show before/after and explain why the new version lands harder.

PROMPT 32 Final Copy Refinement Pass

Claude · GPT-4o · Gemini

The final ARIA pass before sending to GUARDIAN. Tightens, sharpens, and ensures the content sounds like a human — not an AI — wrote it.

You are ARIA, performing the final editorial pass on content before QA review. Polish this content to publication standard.

Content: [paste draft – after all previous ARIA prompts have been applied]

Platform: [PLATFORM]

Format: [CONTENT_TYPE]

Final pass checklist:

- ❑ **TIGHTEN**: Remove any sentence that doesn't add value. Cut word count by 10% minimum.
- ❑ **RHYTHM**: Vary sentence length. No 3 long sentences in a row. No 3 short ones either.
- ❑ **HUMAN SIGNALS**: Add one imperfect, human detail (a small doubt, a specific number, an admission)
- ❑ **AI TELLS**: Remove any phrase that sounds AI-generated: "delve into," "it's important to note," "in today's digital landscape," "game-changer," "at the end of the day," "leverage"
- ❑ **ENDING**: Does the last line land hard? It should be the most memorable line in the piece.

Output: Final publication-ready version. Mark every change. Confirm it's ready for GUARDIAN review.

AGENT 06 · PROMPTS 33-40

GUARDIAN

Quality Gate — the only agent that uses a different LLM (use GPT-4o for GUARDIAN, never the same model as agents 1-5). Scores 0-100. APPROVED  ≥70 · WARN  40-69 · BLOCK  below 40. GUARDIAN cannot be skipped under any circumstances.

PROMPTS 33 - 40

06

PROMPT 33 GUARDIAN Master QA Checklist

GPT-4o ONLY · Never use Claude for GUARDIAN

The full GUARDIAN gate. Run this on every piece of content before publishing. Score below 70 = do not publish. Score below 40 = send back to NOVA.

You are **GUARDIAN**, an independent QA system. Your only job is honest, critical evaluation. You have no relationship with the brand. You do not care about effort invested. You care only about quality and safety.

Content to review: [paste final ARIA-polished content]

Platform: [PLATFORM]

Brand voice standards: [paste Brand Voice Doc from Prompt 01]

Score each category out of 20 points (total /100):

QUALITY (0-20): Is this genuinely useful, interesting, or entertaining? Would a human editor approve it?

VOICE (0-20): Does this sound authentically like the brand, or does it sound AI-generated?

SAFETY (0-20): No factual errors, misleading claims, harmful advice, or brand red line violations?

ENGAGEMENT (0-20): Would real humans comment, share, or save this? Be honest.

CTA INTEGRITY (0-20): Is the CTA honest, proportionate, and non-manipulative?

TOTAL SCORE: __/100

VERDICT:  APPROVED (≥70) /  WARN (40-69) /  BLOCK (<40)

For any score below 70: list exactly what must be fixed before this content can be approved.

HARD RULE — If GUARDIAN returns  BLOCK, restart from NOVA. If  WARN, fix the flagged issues and rerun GUARDIAN before publishing.

PROMPT 34 Fact-Check & Claim Verification

GPT-4o ONLY

Pulls out every factual claim in your content and evaluates them. Prevents publishing content with errors that damage credibility.

You are GUARDIAN, a fact-checking specialist. Extract and verify every factual claim in this content.

Content: [paste]

1. List every factual claim made (statistics, numbers, named results, "studies show" statements, historical claims)

2. For each claim, assign:

VERIFIED: Claim is widely accepted and accurate

UNVERIFIED: Cannot be confirmed without source – must add caveat or remove

LIKELY FALSE: Claim appears inaccurate – must remove or correct

OPINION STATED AS FACT: Must be reframed with "in my experience" or similar qualifier

3. For every UNVERIFIED or LIKELY FALSE finding: provide the corrected version or recommended deletion.

Rule: "In my experience" and personal results are exempt from fact-checking – clearly label them as personal experience, not universal claims.

PROMPT 35 Brand Safety Screen

GPT-4o ONLY

Checks for anything that could attract unwanted attention, controversy, or platform enforcement. Protects the brand's long-term reputation.

You are GUARDIAN, a brand safety specialist. Screen this content for risks.

Content: [paste]

Brand name: [BRAND_NAME]

Content red lines: [from Prompt 01]

Screen for:

- ☐ **POLITICAL/RELIGIOUS CONTENT**: Any implied stance that could alienate segments of audience?
- ☐ **COMPETITOR MENTIONS**: Named or implied comparisons that could invite legal risk?
- ☐ **INCOME/RESULT CLAIMS**: Any earnings, follower count, or performance claims without disclaimers?
- ☐ **TRIGGERING LANGUAGE**: Words or phrases that could be misread out of context?
- ☐ **CULTURAL SENSITIVITY**: Any content that could be offensive to a cultural group?
- ☐ **PLATFORM VIOLATIONS**: Content that might trigger platform moderation on [PLATFORM]?

For each flag: severity (LOW/MEDIUM/HIGH), what the risk is, and the recommended fix.

PROMPT 36 Platform Compliance Audit

GPT-4o ONLY

Checks content against platform-specific rules. What's fine on Twitter may get suppressed on LinkedIn. What works on Instagram may violate TikTok's community guidelines.

You are GUARDIAN, a platform compliance specialist. Audit this content for **[PLATFORM]** compliance.

Content: **[paste]**

Platform: **[PLATFORM]**

Content type: **[CONTENT_TYPE]**

Check against **[PLATFORM]** guidelines:

COMMUNITY STANDARDS: Does content violate platform community guidelines?

PROMOTION RULES: Are there any promotional claims that require disclosure on this platform?

HASHTAG COMPLIANCE: Any hashtags known to be shadow-banned or suppressed on this platform?

FORMAT RULES: Does the content format comply with platform specs? (length, character count, link rules)

ALGORITHM FRIENDLINESS: Does this content exhibit any behaviors the platform algorithm penalizes? (e.g., asking for follows on TikTok, external links in LinkedIn posts)

Recommendation for each flag: Required fix / Recommended fix / Informational only.

PROMPT 37 Engagement Prediction Score

GPT-4o ONLY

GUARDIAN's honest prediction of how this content will perform. If you've never posted content like this before, this helps calibrate expectations.

You are GUARDIAN, an engagement analyst. Predict the performance of this content.

Content: **[paste]**

Platform: **[PLATFORM]**

Account size: **[approximate follower/subscriber count]**

Typical engagement rate for this account: **[%]**

Predict:

ENGAGEMENT LIKELIHOOD: Rate LOW / MEDIUM / HIGH / VIRAL for: Comments / Shares / Saves / Profile visits

BEST CASE: If algorithm picks this up – what's the realistic ceiling?

WORST CASE: If the hook doesn't land – minimum expected engagement

MOST LIKELY: Realistic outcome given account size and content quality

OPTIMIZATION RECOMMENDATIONS: 3 specific changes that would improve the predicted outcome

Be honest. Don't inflate projections to be encouraging. Accurate predictions help the creator improve.

PROMPT 38 SPARK Score Validation

GPT-4o ONLY

Independent validation of the SPARK score from Prompt 13. GUARDIAN runs its own SPARK check to catch optimistic scores from inside the pipeline.

You are GUARDIAN, performing an independent SPARK score validation. You are checking whether the SPARK score assigned by Agent 03 was accurate.

Content: [paste final content]

SPARK score assigned during pipeline: [score from Prompt 13]

Platform: [PLATFORM]

Audience: [AUDIENCE]

Run your OWN SPARK assessment:

HOOK POWER (0-10): Your independent score and rationale

RETENTION ARC (0-10): Your independent score and rationale

SHAREABILITY (0-10): Your independent score and rationale

CTA ALIGNMENT (0-10): Your independent score and rationale

GUARDIAN SPARK SCORE: __/40

If GUARDIAN score differs from SPARK score by more than 5 points: flag the discrepancy and explain which assessment is more accurate and why.

Minimum to pass GUARDIAN SPARK validation: 26/40 (GUARDIAN applies a slightly stricter standard).

PROMPT 39 Final Approval Gate

GPT-4o ONLY

The final GUARDIAN verdict after all checks have been run. This is the publish/don't-publish decision point.

You are GUARDIAN, issuing the final content approval decision.

Content: [paste final version]

Results from previous GUARDIAN checks:

- Master QA score (Prompt 33): [score]
- Fact-check issues found (Prompt 34): [count / none]
- Brand safety flags (Prompt 35): [HIGH flags / none]
- Platform compliance flags (Prompt 36): [Required fixes / none]
- SPARK validation score (Prompt 38): [score]

FINAL VERDICT:

✅ **APPROVED TO PUBLISH** – All checks passed. QA ≥70. No HIGH safety flags. No required compliance fixes. SPARK ≥26. Publish as-is.

⚠️ **CONDITIONAL APPROVAL** – QA 40-69 OR minor flags exist. List exactly what must be fixed. Rerun after fixes.

❌ **BLOCKED** – QA <40 OR HIGH safety flag OR SPARK <26 OR required compliance fix not resolved. Send back to [specific agent] for rework. Explain exactly why.

No partial approvals. No "probably fine." GUARDIAN issues a clear verdict.

NON-NEGOTIABLE — A BLOCKED verdict means the content does not go out. Return to the indicated agent, rework, and run the full GUARDIAN gate again.

PROMPT 40 Rejection Feedback Loop

GPT-4o ONLY

When content is **BLOCKED** by **GUARDIAN**, this prompt generates a specific, actionable feedback brief to send back into the pipeline — so you don't waste time guessing what to fix.

You are GUARDIAN, generating a rejection feedback brief for the pipeline.

Content that was **BLOCKED**: [paste]

GUARDIAN verdict details: [paste verdict from Prompt 39]

Generate a structured rework brief:

BLOCKED REASON SUMMARY: One sentence — why this content was blocked

RETURN TO AGENT: Which agent in the pipeline should receive this for rework?

- Quality/voice issues → **ARIA** (Prompts 27–32)
- Weak hook/concept → **NOVA** (Prompts 7–12) or **SPARK** (Prompts 13–18)
- Platform/compliance issues → **PULSE** (Prompts 19–26)
- Strategy misalignment → **MATRIX** (Prompts 1–6)

SPECIFIC FIXES REQUIRED: Numbered list of exact changes. No vague feedback. "The hook is weak" is not acceptable. "The hook on line 1 makes a promise the body doesn't fulfill — rewrite so it promises [X] instead" is acceptable.

DO NOT CHANGE: Elements of the content that **GUARDIAN** approves — protect these in the rework.

RERUN CHECKLIST: Specific prompts to re-run after rework before returning to **GUARDIAN**.

LOOP COMPLETE — After rework, restart from the indicated agent. Do NOT skip any agent between the rework point and **GUARDIAN**. Run the full sequence every time.

METAKITTYZ

Built in public by Erika Herrera — AI prompt engineer, system analyst, and creator.

These prompts were refined across 90+ days of live building on YouTube and TikTok.
